SUMMARY

From Idlib-Syria, Born in 2000, Web Developer with over 5 years of experience in implementing user interfaces, microservices, design patterns, RESTful APIs, Vue.js and Node.js. Expertise in building scalable and maintainable back-end and front-end solutions. Skilled in creating ERD (Entity-Relationship Diagrams) for systems, converting them into efficient database structures, authentications and security.

SKILLS

- Node.js, Express.js, Typescript, JavaScript, JQuery Socket.io, Html, CSS, Vue.js, Axios.js, Json Web Token, Joi.
- SQL, MYSQL, PL-SQL, Knex.js, No SQL, MongoDB, Mongoose.
- VPS (Hostinger), Linux.
- MVC, Design patterns, OOP, ERD diagrams, Class diagram
- Algorithms, Data structure, Problem-solving.
- Communication , Organization , Clean code, Documentation.

EXPERIENCE

November 2024 - Current

Full Stack Engineer – Proud Panda Network Technology L.L.C | Dubai

- Converting UI designs into interactive user interfaces.
- Building responsive user interfaces compatible with all screen sizes.
- Interacting with APIs and fetching data from the back-end.
- Fixing issues across multiple projects.

February 2024 – November 2024

Logistics Assistant - Velvet Furs General Trading L.L.C | Dubai

- Managing several warehouses and following up on release and receipt operations.
- Assessing material quantities.
- Tracking shipments.
- Handling relevant documentation.
- Developed a precise and efficient warehouse management database.
- Produce daily reports on inventory levels.
- Implemented Erd Diagrams for our logistics system in the company.

July 2021 – January 2024

Back-End Web Developer – Freelance | Dubai

- Analyzed several real-world projects based on customer requirements.
- Developed and deployed multiple RESTful APIs that are customizable and scalable with Node.js and Express.js.
- Built numerous MySQL databases based on ERD diagrams.
- Integrated some web APIs with user interfaces.
- Tested web backends using the Postman tool.

PROJECTS

- **Washing Cars System API**
This API is developed using Node.js, Express.js, and follows the MVC pattern. It utilizes a MySQL database for data storage. The API is designed for a car washing system, providing functionalities to add washing orders, services, invoices, and car information. It also includes functions for updating, deleting, searching, and displaying data.
https://github.com/mahmoudAlAhmad3043/Washing_System
- **Web Chat Application**
Developed using React.js and Node.js, express.js, socket.io.
<https://github.com/mahmoudAlAhmad3043/client-react-app>
<https://github.com/mahmoudAlAhmad3043/Node-Js-server>
- **CodeForces Helper**
An Adaptive website to train solving competitive programming problems developed using React.js and Python. https://github.com/mahmoudAlAhmad3043/codeforces_helper
- **Leon Web Site**
Developed using HTML and CSS.
<https://mahmoudalahmad3043.github.io/Leon>

EDUCATION

September 2018 – July 2023

- **Bachelors of Electronic Engineering - ALEPPO UNIVERSITY | Computer Engineering.**

CERTIFICATES

- Supervised Machine Learning - Stanford - Online 2022 | Regression and Classification.

ACTIVITIES

- Participated in the ICPC competitive programming contest in 2023.
- Solved numerous problems on CodeForces, <https://codeforces.com/profile/mahmoudahmad3043>

LANGUAGES

- Arabic.
- English.
